

Smart Medicine Reminder System

A simple, free, and user-friendly web application designed to help patients — especially seniors — never miss a dose again.

HEALTHCARE TECHNOLOGY

MEDICATION ADHERENCE

The Problem We're Solving

Millions of people — elderly patients, those with chronic conditions, and busy professionals — forget to take their medicines on time. Missed doses can lead to serious health complications, hospitalizations, and worsening conditions.

Complex Apps

Most existing reminder apps are difficult to navigate, especially for non-technical users.

Paid Subscriptions

Many tools require payment, putting them out of reach for those who need them most.

No History Tracking

Patients lack a clear record of taken and missed doses to share with caregivers or doctors.

What the System Does

Our solution is built around five core goals — keeping medication management simple, consistent, and accessible for everyone.

1

Easy Scheduling

Add, edit, and delete medicine schedules with just a few clicks.

2

Timely Reminders

Automated alerts fire at the exact scheduled time — no dose missed.

3

Simple Tracking

Mark medicines as taken or missed directly from your dashboard.

4

Full History

A complete report of all past doses, available anytime for review.

5

Better Health

Improved adherence means better outcomes and peace of mind.

Key Features at a Glance

→ User Registration & Login

Secure, private accounts for every user.

→ Today's Dashboard

A clear view of all medicines scheduled for the day.

→ Medicine History Report

Track adherence over time with a full dose log.

→ User-Friendly Interface

Designed for simplicity—no technical skills required.

Built with: Django (Python) · HTML5, CSS3, Bootstrap · SQLite · APScheduler for automated reminders

Expected Impact & What's Next

Expected Outcome

The system will help users remember their medicines through timely reminders and maintain a complete medication history. It provides an easy-to-use solution for patients — especially senior citizens — reducing missed doses and improving overall healthcare management.

Future Roadmap SMS & Email Notifications

01

Reach users even when they're away from their device.

02

Mobile App Integration

Native apps for iOS and Android for on-the-go access

02

Caregiver & Doctor Access

Allow trusted family members and clinicians to monitor

04
